MOSER BAER SOLAR GROUP

TÜV Rheinland STAR ID: 0091-ZIN5-08-0003

Explanation: How to read the evaluation results?

TÜV Rheinland STAR does not establish compulsory requirements, but compares the evaluated organization to best-in-class practices. As indicated in the table below, each star/value rating is associated with a certain risk assessment. Improvement suggestions vary from 'highly recommended' to no improvement necessary for 'best-in-class' organizations. Certainly, low risk areas also offer improvement potential, but each evaluated organization should decide individually on which areas to focus.

★★★★★	96 to 100%	Outstanding	Very Low Risk	Best-in-class
★★★★	90 to <96%	Excellent	Low Risk	Improvement for better performance if deemed necessary
★★★	80 to <90%	Very good	Low Risk	Improvement for better performance if deemed necessary
★★	70 to <80%	Good	Medium Risk	Improvement recommended
★	60 to <70%	Satisfactory	High Risk	Improvement highly recommended
no star	<60%	No star	High Risk	Improvement highly recommended

For further explanations, please contact your TÜV Rheinland STAR contact person or write an email to tuv-star@jpn.tuv.com.
